

# MDLab COVID-19 Monoclonal Antibody Treatment

## MONOCLONAL ANTIBODY TREATMENT

REGENERON monoclonal antibody (mAb) therapy has been shown to significantly reduce the need for hospitalization and the duration of symptoms in patients diagnosed with COVID-19. MDLab has partnered with the Texas Department of State Health Services to create mAb Treatment Centers in Rockwall County and Ellis County.

## ELIGIBILITY CRITERIA

Patients must meet the following criteria:

- Positive COVID-19 test (we can perform a rapid test at our clinic, if necessary)
- Within 10 days of symptom onset
- Age 12 years and older
- Able to maintain at least 92% oxygen saturation without supplemental oxygen
- Meet at least **one** of the health risk criteria

**A PHYSICIAN REFERRAL IS NOT REQUIRED**

## NO COST TO PATIENTS

(We bill insurance for an  
administrative fee only)
